

company ahead of the curve and was responsible for transitioning the utility to full computerization. Mr. Arnold was instrumental in assisting Conway Corporation in leading a path to diversifying services by adding new services for the citizens, such as digital cable, internet, telephone, security services, and water.

Mr. Arnold recently earned a national recognition after being listed in the "Regional 50" in Cablefax magazine. My congratulations and best wishes for Mr. Arnold's future endeavors.

IN HONOR OF THE 100TH BIRTHDAY OF MR.
HERMAN HIGGS

Mr. HILL. Mr. Speaker, I rise today in honor of Mr. Herman Higgs, a World War II veteran who celebrated his 100th birthday last month. Born in Calhoun County, Arkansas, Herman was drafted into the Army and served the entire span of World War II, including as a POW in the last year. He was a platoon sergeant of a transportation convoy that was captured in December 1944 during the Battle of the Bulge.

In the spring of 1945, Patton's army arrived, and Herman was freed, along with other American GIs and the Jewish prisoners who had survived the atrocities of the Third Reich. He was granted an honorable discharge a few months later and returned to Calhoun County, where he served 29 years as a police officer and 24 years as a U.S. marshal.

The city of North Little Rock, Arkansas, dedicated May 13 as Herman Higgs Day. Herman's example is one that all Americans and Arkansans can admire, and I would like to extend my congratulations to Herman for his life of service and this remarkable milestone of a centennial birthday.

HONORING DR. GAIL CARBERRY

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts (Mr. MCGOVERN) for 5 minutes.

Mr. MCGOVERN. Mr. Speaker, I rise today to celebrate the accomplishments of Dr. Gail Carberry of Quinsigamond Community College in Worcester, Massachusetts, who will be retiring after a decade of tireless service to the QCC family and over 40 years of inspiring students across the Commonwealth.

From early on, Dr. Carberry recognized the impact one committed teacher can make in a young person's life. She understands at her core that community colleges present a transformative opportunity for students to be recognized for their talents and encouraged toward their goals.

Dr. Carberry is a passionate advocate for expanding access to the opportunities that community colleges can provide. Because of Dr. Carberry's conviction that every student can achieve, QCC implemented a high school dropout prevention program, and Dr. Carberry personally endowed over

\$200,000 in scholarships for local community college students. She diversified the students, faculty, and staff populations to better reflect the community and implemented award-winning STEM programs to prepare students for the rapidly changing 21st century workplace.

In keeping with her desire to equip her students with the skills they need to compete in the modern workforce, Dr. Carberry successfully opened a 72,000-square-foot campus in downtown Worcester dedicated to the college's healthcare program, which not only addressed the needs of QCC students, but reinvigorated a large portion of downtown Worcester.

As a result of Dr. Carberry's leadership, QCC has become a leading institution of higher learning in Massachusetts. This year, QCC graduated almost double the number of students it did only 10 years ago. Dr. Carberry has exceeded fundraising goals and has increased enrollment by nearly 40 percent.

Mr. Speaker, on behalf of the city of Worcester, on behalf of the people of Massachusetts, and most importantly of all, on behalf of the students she has helped to achieve their dreams, I want to say thank you to Dr. Gail Carberry. We all owe her a heartfelt debt of gratitude and wish her great satisfaction in her endeavors to come.

TAX REFORM

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. FITZPATRICK) for 5 minutes.

Mr. FITZPATRICK. Mr. Speaker, while our Nation faces many challenges, perhaps none is more pressing than that of growing our economy. The positive impact of strong, sustained economic growth has the potential not only to help families make ends meet, but it will also address the many other pressures we face. The time is now for Congress and this administration to act on meaningful tax reform.

The model is simple and straightforward. We need to simplify the ridiculously complex Internal Revenue Code, eliminate the loopholes that allow corporations and individuals to avoid paying their fair share, lower the rates for middle class families and small businesses, and broaden the tax base.

As a certified public accountant, an independent voice for the people of Bucks and Montgomery Counties, I intend to push vehemently to make tax reform a reality in this Congress. Moreover, this can and must be a bipartisan priority.

A 1.5 percent growth in GDP is simply unsustainable. If that trend continues, we will not be able to fund priorities such as bolstering our national security, taking care of our veterans, combating the addiction crisis, funding public education, preserving our environment, and a whole host of other priorities.

Economic growth has three essential aspects: tax reform, regulatory reform, and a balanced budget. The REINS Act and the upcoming vote on the CHOICE Act will start this process on the regulatory side, which will revive the ability of community banks to support local economies and advance infrastructure investment that puts Americans back to work by rebuilding roads, schools, bridges, as well as our IT infrastructure and the electrical grid.

The other critical component is tax reform, and we owe it to the American people to get this done. I call on my good colleagues from both sides to put politics aside and do what we were sent here to do, and that is to stand up for hardworking families and unleash the power of the American economy.

TYPE 1 DIABETES

Mr. FITZPATRICK. Mr. Speaker, over a million Americans, including 200,000 young Americans, are living with type 1 diabetes, an autoimmune disease in which a person's pancreas stops producing insulin. This disease is fatal without strict adherence to a regimented schedule of multiple daily insulin injections or continuous pump infusions, along with close monitoring of blood glucose levels.

My constituent Aislinn Keenan was diagnosed with type 1 diabetes when she was just 2 years old. She does not remember a day when she did not need to lance her finger multiple times a day to check her blood sugar or receive insulin injections. Despite these challenges, Aislinn and her family serve as an inspiration to all those facing this disease. Through courage and perseverance, they refuse to let type 1 diabetes stand in their way. Aislinn just finished her sophomore year at Villanova University.

The Juvenile Diabetes Research Foundation projects that 5 million Americans will have type 1 diabetes by 2050, including 600,000 young people, yet only one-third of the people with type 1 diabetes are achieving safe blood glucose levels. Accordingly, I am urging my colleagues to fully fund the National Institute of Diabetes and Digestive and Kidney Diseases.

Presently, there is no way to prevent type 1 diabetes and no cure for it once diagnosed. Only through robust funding and exhaustive research at the NIH can we continue to drive scientific progress to make the lives of those living with type 1 diabetes safer and healthier.

HONORING SPECIALIST KERRY M.G. DANYLUK

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. FARENTHOLD) for 5 minutes.

Mr. FARENTHOLD. Mr. Speaker, I rise today to tell you about the new Army Specialist Kerry M.G. Danyluk Memorial in Yoakum, Texas, which was unveiled last week on Memorial Day.
